UVOD

Svrha službene statistike jest proizvodnja i diseminacija reprezentativnih i mjerodavnih statističkih podataka u skladu s temeljnim načelima službene statistike.

Državni zavod za statistiku obavlja poslove službene statistike na temelju Zakona o službenoj statistici, Strategije razvitka službene statistike Republike Hrvatske 2004. – 2012., Programa statističkih aktivnosti Republike Hrvatske 2008. – 2012. i godišnjih provedbenih planova statističkih aktivnosti.

Statističko istraživanje o pomorskom prometu jest moderan statistički proces koji obilježava dobra metodologija, prikladni statistički postupci, minimalna opterećenost davatelja podataka i ekonomičnost. Tromjesečni i godišnji podaci o pomorskom prometu redovito se od 2006. šalju u Statistički ured Europske unije, Eurostat.

Metodološki okvir za navedeno istraživanje slijedi statističke standarde i dobru praksu zemalja EU, ali i nastavlja tradiciju nacionalne pomorske statistike.

Usporedno s početkom razvoja informacijskog sustava nadzora i upravljanja pomorskim prometom od strane Ministarstva mora, prometa i infrastrukture, Državni zavod za statistiku je u suradnji s Ministarstvom mora, prometa i infrastrukture implementirao u sustav sve potrebne varijable i kontrole za potrebe statistike. Pri obradi ulaznih podataka u Državnom zavodu za statistiku primjenjuju se dodatne kontrole radi dobivanja kvalitetnog statističkog proizvoda.

Kontinuirano se prati opterećenost davatelja podataka i u dogovoru s Ministarstvom mora, prometa i infrastrukture pronalaze se rješenja za smanjivanje opterećenosti gdje je to moguće.

Prikupljanje podataka, kodiranje, analiza i potvrđivanje podataka potpuno su automatizirani.

U ovoj publikaciji objavljuju se rezultati za razdoblje od 2006. do 2010.

Ovom publikacijom željeli bismo potvrditi važnost statistike kao dijela svakodnevnog života te pružiti pouzdane informacije za donošenje svih relevantnih odluka u području pomorskog prometa. Sa zahvalnošću ćemo primiti sve primjedbe i sugestije budućih korisnika koje će pridonijeti boljem razumijevanju i poboljšanju statistike pomorskog prometa.

INTRODUCTION

The purpose of the official statistics is the production and dissemination of statistical data in conformity with the fundamental principles of the official statistics.

The Croatian Bureau of Statistics performs the tasks of official statistics according to the Official Statistics Act, the Development Strategy of Official Statistics 2004 – 2012, the Programme of Statistical Activities 2008 – 2012 and annual implementation plans of statistical activities.

The Statistical Survey on Traffic in Seaports is a modern statistical process characterised by a sound methodology, appropriate statistical procedures, the minimal burden on respondents and cost effectiveness. Since 2006. quarterly and annual data on traffic in seaports have been regularly transmitted to the Statistical office of the European Communities, Eurostat.

The methodological frame for the survey sticks to statistical standards and the best practice of the EU Member States. However, the tradition of the Croatian national maritime statistics is preserved as well.

The Croatian Bureau of Statistics has implemented all requested variables and controls for statistical purposes into the system in co-operation with the Ministry of the Sea, Transport and Infrastructure concurrently with the development, by the same Ministry, of the information system for monitoring and management of the maritime traffic. While processing the input data, the Croatian Bureau of Statistics applies additional activities (editing and imputation) in order to produce high quality statistical data.

The Croatian Bureau of Statistics continuously monitors the response burden and, in consultation with the Ministry of the Sea, Transport and Infrastructure, finds solutions for its reduction wherever it is possible.

Data collection, coding, analyses and validation are completely automated.

The results of the survey for the period from 2006 to 2010 are published in this publication.

With this publication, we would like to underline the importance of statistics as a part of everyday life as well as to provide reliable information for making of all relevant decisions in the field of maritime transport. We appreciate any comment and suggestion from future users that will contribute to better understanding and improving of the maritime traffic statistics.

METODOLOŠKA OBJAŠNENJA

Svrha statističkog istraživanja o pomorskom prometu jest prikupiti osnovne mjesečne podatke o prometu brodova, putnika i robe u morskim lukama Republike Hrvatske.

Jedinica promatranja jest svaki brod koji dolazi u morske luke i/ili odlazi iz morskih luka, bez obzira na aktivnost koju obavlja.

Izvori i metode prikupljanja podataka

Do 2004. podaci su se prikupljali izvještajnom metodom, obrascima Prijava o dolasku broda u luku (PP/M-31a) i Prijava o odlasku broda iz luke (PP/M-31b). Prijave su ispunjavali zapovjednici broda za domaće brodove i brodski agenti, a zaposlenici lučkih kapetanija i ispostava prikupljali su prijave, šifrirali ih i dostavljali u Državni zavod za statistiku. Unos i obrada prijave provodili su se Državnom zavodu za statistiku na centralnom IBM računalu.

Od 2004. statističko istraživanje o pomorskom prometu Državni zavod za statistiku provodi koristeći se podacima u informacijskom sustavu nadzora i upravljanja pomorskim prometom Ministarstva mora, prometa i infrastrukture. Državni zavod za statistiku preuzima od Ministarstva mora, prometa i infrastrukture bazu podataka i dalje je statistički obrađuje. Budući da se od 2004. primjenjuje nova metodologija i nova tehnologija prikupljanja podataka te je znatno poboljšan obuhvat unutarnjeg prometa, podaci nisu u potpunosti usporedivi s prijašnjim godinama. U razdoblju od 2006. do 2008. izvori podataka, obuhvat i sustav izvještavanja za neke luke prilično je poboljšan.

Statističko istraživanje potpuno je usklađeno s pravnom stečevinom Europske unije za područje statistike pomorskog prometa:

- Direktivom br. 2009/42/EZ Europskog parlamenta i Vijeća od 6. svibnja 2009. o statističkim izvještajima u vezi s prijevozom robe i putnika morem, (prerađena verzija)
- Odlukom Komisije br. 2001/423/EZ od 22. svibnja 2001. o uvjetima publiciranja i diseminacije statističkih podataka prikupljenih u sklopu Direktive Vijeća 95/64/EZ o statističkim izvještajima u vezi s prijevozom robe i putnika morem.

NOTES ON METHODOLOGY

The purpose of the statistical Survey on Maritime Transport is to collect the monthly data on traffic of ships, passengers and goods in seaports of the Republic of Croatia.

An observation unit is any ship that enters and/or leaves a seaport, regardless of the activity it performs.

Sources and methods of data collection, coverage and definitions

Until 2004, data were collected by using the reporting method, on the Report on Arrivals of Ships into Seaports (PP/M-31a form) and the Report on Departures of Ships from Seaports (PP/M-31b form) questionnaires. The reports were filled in by ship captains for domestic ships and ship agents for foreign ships, while employees in Harbour master's offices or branch offices collected, coded and sent the reports to the Croatian Bureau of Statistics. Data entering and processing was carried out in the Croatian Bureau of Statistics on the IBM mainframe computer.

Since 2004, the statistical survey on maritime transport has been carried out by using the databases of the Ministry of Sea, Transport and Infrastructure. The Croatian Bureau of Statistics takes over the database from the Ministry of Sea, Transport and Infrastructure, after which it performs further processing. As since 2004 a new methodology and technology of data collection have been applied and the statistical coverage of domestic traffic has been significantly improved, data are not fully comparable to those from previous years. In the period from 2006 to 2008, data sources, data coverage and reporting system improved considerably.

The statistical survey is methodologically harmonised with the acquis of the European Union concerning the maritime transport statistics:

- *Directive No 2009/42/EC of the European Parliament and of the Council of 6 May 2009 on statistical returns in respect of carriage of goods and passengers by sea (Recast)*
- *Commission Decision No 2001/423/EC of 22 May 2001 on arrangements for publication or dissemination of the statistical data collected pursuant to Council Directive 95/64/EC on statistical returns in respect of carriage of goods and passengers by sea.*

Obuhvat

Statističkim istraživanjem obuhvaćeni su svi brodovi domaće i stranih zastava koji su uplovili ili otplovili iz morskih luka Republike Hrvatske, bez obzira na aktivnosti koje obavljaju u luci.

Podaci obuhvaćaju prispjele i otputovale brodove, ukrcane i iskrcane putnike te utovarenu i istovarenu robu i odnose se na rad svih morskih luka u Republici Hrvatskoj.

Podaci o prometu putnika uključuju i putnike na brodovima za kružna putovanja (cruiseri) koji su se iskrcali radi obilaska luke ili grada te se ponovo ukrcali radi nastavka kružnog putovanja. Podaci sadrže njihov iskrcaj i ponovni ukrcaj.

Podaci o prometu brodova, putnika i robe po lučkim kapetanijama i lukama odnose se na statističke luke. Podatak za svaku statističku luku sadržava i podatke za sve izvještajne luke koje su pod ingerencijom dotične statističke luke.

Definicije

Definicije su usklađene sa Dodatkom I Direktive br. 2009/42/EZ o statističkim izvještajima u vezi s prijevozom robe i putnika morem (prerađena verzija) i Pojmovnikom za statistiku prometa, 4. izdanje, Eurostat, ITF, UNECE.

Coverage

The statistical survey includes all ships under domestic and foreign flags that arrived in or departed from the seaports in the Republic of Croatia, regardless of the activity they perform.

Data include arrived and departed ships, embarked and disembarked passengers and loaded and unloaded goods and relate to activities in all seaports in the Republic of Croatia.

Data on the traffic of passengers include passengers on cruise ships who disembarked for a visit to a port or a city and then re-embarked to continue their cruise. The data include both the disembarkation and re-embarkation of passengers.

Data on the traffic of ships, passengers and goods by harbour master's offices and ports refer to statistical ports. The data on each statistical port also include data on all ports under authority of the statistical port concerned.

TRAFFIC OF SHIPS IN SEAPORTS, 2006 – 2010

PROMET BRODOVA U MORSKIM LUKAMA OD 2006. DO 2010.
TRAFFIC OF SHIPS IN SEAPORTS, 2006 – 2010

Broj prispjelih brodova u morske luke Republike Hrvatske u 2010. pokazuje pad od 4,7% u odnosu na 2009., dok je ukupna bruto tonaža prispjelih brodova porasla za 4,5%, što upućuje na povećanje veličine brodova koji uplovljavaju u naše luke. Od ukupno prispjelih brodova u 2010. brodovi domaće zastave zastupljeni su s 97,2%.

Pad prometa prispjelih brodova u 2010. u odnosu na 2009. pokazuju statističke luke Dubrovnik (6,3%), Ploče (12%), Cres (1%), Rab (4,8%), Jablanac (5,5%), Split (0,1%), Biograd (1,8%) i Zadar (9,9%). Ti su rezultati posljedica distribucije prometa između različitih vrsta brodova u svakoj pojedinoj statističkoj luci.

Tijekom cijelog razdoblja od 2006. do 2010. brodovi za generalni teret, putnički brodovi i brodovi za kružna putovanja bruto težine do 499 GT-a najzastupljeniji su u ukupnim dolascima brodova u morske luke Republike Hrvatske. Vrsta broda „brod za generalni teret“ najzastupljenija je vrsta broda u ukupnom prometu brodova. Predstavlja 70% od ukupne bruto težine brodova i 52% ukupnih kretanja brodova u 2010. U toj kategoriji najzastupljeniji su trajekti, a njima se odvija najveći dio putničkog prijevoza. Druga najvažnija kategorija brodova jesu putnički brodovi. Oni čine gotovo 22% prometa u terminu bruto težine i 44% ukupnih kretanja brodova. Udio kontejnerskih brodova u ukupnoj bruto težini brodova jest 3,3% a u ukupnim kretanjima brodova samo 0,2%.

U 2010. broj prispjelih brodova za tekući teret pao je za 7,3% u odnosu na 2009., brodova za suhi rasuti teret za 14,4%, kontejnerskih brodova za 5,8%, brodova za generalni teret za 3,3%, teglenica za suhi teret 47,3%, putničkih brodova za 6,6%. Povećanje prometa pokazuju brodovi za posebne namjene, za 150%, ribarski brodovi za 2,2% i brodovi za odobalnu djelatnost za 38,4%.

Od ukupno prispjelih brodova u morske luke Republike Hrvatske u 2010., njih 5 691 je prispjelo iz strane luke, dakle samo 2,4%. U odnosu na 2009. promet prispjelih brodova iz strane luke u 2010. pao je za 8,2% i iznosi najmanje od 2006.

Od ukupno prispjelih brodova iz strane luke, 82,5% čine brodovi strane zastave. Najzastupljeniji su brodovi panamske zastave (12,9%), malteške (10,8%), talijanske (9,2%), ciparske (5,9%) te zastave Belizea (5,7%).

The number of arrived ships in seaports of the Republic of Croatia in 2010 decreased by 4.7% compared to 2009, while the total gross tonnage of arrived ships increased by 4.5%, which is indicative of an increasing size of ships operating in our ports. Out of the total arrived ships in 2010, the domestic flags were represented with 97.2%.

The decrease of arrived ships in 2010, as compared to 2009, was recorded in the statistical ports of Dubrovnik (6.3%), Ploče (12%), Cres (1%), Rab (4.8%), Jablanac (5.5%), Split (0.1%), Biograd (1.8%) and Zadar (9.9%). These results are the outcome of the distribution of traffic between different categories of vessels in each statistical seaport.

During the whole period from 2006 to 2010, general cargo ships, passenger ships and cruise ships with gross tonnage up to 499 GT were the most represent type of ships in the total ships arrivals in seaports of the Republic of Croatia. The ship type "General cargo, non specialised ships" is the dominant type of ships in the total traffic. It represents 70% of the total gross tonnage of vessels and 52% of the total ship movements in 2010. Ferries are the most dominant type in this category and they are present in the major part of passenger traffic. The second most important ship category is passenger ships. They represent almost 22% of the total traffic in terms of the total gross vessel tonnage and 44% of the total movements of ships. The share of container ships in the total gross vessel tonnage is 3.3% and only 0.2% in the total movements of ships.

In 2010, the number of arrivals of liquid bulk ships decreased by 7.3% compared to 2009, of dry bulk ships by 14.4%, of container ships by 5.8%, of general cargo, non specialised ships by 3.3%, of dry cargo barges by 47.3% and of passenger ships by 6.6%. The increase of arrivals was shown in the traffic of specialised ships (by 150%), fishing ships (by 2.2%) and offshore activity ships (by 38.4%).

Out of the total arrived ships in seaports of the Republic of Croatia in 2010, there were 5 691 ships that arrived from a foreign port (only 2.4%). As compared to 2009, arrivals of ships from foreign ports decreased in 2010 by 8.2%, which has been the lowest number since 2006.

Out of the total arrived ships from foreign ports, 82.5% are foreign flag ones. The most numerous were the ships with the flag of Panama (12.9%), of Malta (10.8%), of Italia (9.2%), of Cyprus (5.9%) and of Belize (5.7%).

1) Porast prometa u 2008. prouzročen je pojavom novih izletničkih putovanja.

2) Porast između 2007. i 2008. djelomično je prouzročen poboljšanjem sustava izvještavanja.

3) Od 2008. isključen je promet brodova u brodogradilištu.

1) The increase of traffic in 2008 was caused by the introduction of new same-day excursions

2) The increase between 2007 and 2008 is partly due to the improvement of the reporting system.

3) Since 2008, the traffic of ships in shipyard has been excluded.

PROMET PUTNIKA U MORSKIM LUKAMA OD 2006. DO 2010.

PROMET PUTNIKA U MORSKIM LUKAMA OD 2006. DO 2010.
TRAFFIC OF PASSENGERS IN SEAPORTS, 2006 – 2010

U 2010. u morskim lukama Republike Hrvatske ukrcalo se i iskrcalo ukupno 27 565 tisuća putnika. Od ukupnog broja putnika u unutarnjem prometu ukrcalo se i iskrcalo ukupno 24 495 tisuća putnika (88,9%), a u međunarodnom 3 071 tisuća putnika (11,1%). U odnosu na 2009., u kojoj je ukupan broj putnika iznosio 28 257 tisuća, podaci za 2010. pokazuju pad od 2,4%. Unutarnji promet bilježi pad prometa putnika za 4,0%, a međunarodni promet bilježi porast od 11,8%.

The total number of embarked and disembarked passengers in seaports of the Republic of Croatia in 2010 was 27 565 thousand. Out of total number of passengers, 24 495 thousand (88.9%) embarked and disembarked in the national traffic and 3 071 thousand (11.1%) in the international traffic. As compared to 2009, when the total number of passengers amounted to 28 257 thousand, data for 2010 showed a decrease of 2.4%. The national traffic decreased by 4.0%, while the international traffic increased by 11.8%.

Nema veće razlike u podacima između doputovalih (iskrcanih) i otputovalih (ukrcanih) putnika. To rezultira činjenicom da se najveći dio putničkog prijevoza zbiva na trajektnim i brodskim linijama i manji dio na brodovima za kružna putovanja. Isti putnici broje se i u luci ukrcaja i u luci iskrcaja.

There were no significant differences in the number of arrivals (disembarkation) and departures (embarkation) of passengers. This is due to the fact that the major part of the passenger transport takes place on the ferries and passenger boats and only a minor part on cruise ships. The same passengers are counted both in the port of embarkation and in the port of disembarkation.

Ovi podaci uključuju sve nacionalne trajektno veze. Podaci za statističku luku Korčula uključuju ukupan promet putnika na relaciji Korčula – Orebić i pokazuju pad prometa putnika u 2010. u odnosu na 2009. za 4,5%. Luka Cres (Brestova – Porozina) pokazuje također pad prometa putnika u 2010. u odnosu na 2009. za 9,2%, Jablanac (Jablanac – Mišnjak) pad za 8,9%, Preko (Preko – Tkon) pad za 4,4%, a Novalja (Prizna – Žigljen) pokazuje pad za 14,4%.

These figures include all national ferry lines. The data for the statistical port of Korčula included the total number of passenger traffic between Korčula and Orebić and showed a decrease of passenger traffic in 2010 of 4.5%, as compared to 2009. The port of Cres (Brestova – Porozina ferry line) showed a decrease of passenger traffic in 2010 of 9.2%, as compared to 2009. The passenger traffic in the port of Jablanac (Jablanac – Mišnjak) decreased by 8.9%, in the port of Preko (Preko – Tkon) 4.4% and in the port of Novalja (Prizna – Žigljen) by 14.4%.

Od ukupnog broja putnika u 2010. kroz luku Split ukupno je prošlo 3 837 tisuća putnika (14%), a kroz luku Dubrovnik 2 940 tisuća putnika (11%).

Out of total number of passengers, 3 837 thousand of passengers (14%) passed through the port of Split in 2010 and 2 940 thousand of passengers (11%) through the port of Dubrovnik.

Od ukupno 3 071 tisuće putnika u međunarodnom prometu, 2 741 tisuća putnika, odnosno 89,3%, doputovalo je i otputovalo brodovima strane zastave, i to: 774 tisuća putnika doputovalo je brodovima panamske zastave (28,3%), brodovima talijanske zastave doputovalo je 574 tisuće putnika (20,9%), a 456 tisuća putnika doputovalo je brodovima bahamske zastave (16,6%).

Out of the total of 3 071 thousand passengers in the international traffic, 2 741 thousand (89.3%) arrived and departed by ships with foreign flags: 774 thousand (28.3%) arrived on ships with the flag of Panama, 574 thousand (20.9%) on ships with the flag of Italia and 456 thousand (16.6%) on ships with the flag of Bahamas.

Od ukupno 1 542 tisuće putnika koji su doputovali iz stranih luka i iskrcali se u morskim lukama Republike Hrvatske u 2010., a među kojima su uključeni i putnici s brodova na kružnom putovanju, najviše ih je doputovalo iz Italije (83,4%), zatim slijede putnici iz Grčke (7,2%), Ujedinjene Kraljevine (5%), Španjolske (1,3%) i Slovenije (1,1%).

Out of the total of 1 542 thousand passengers who arrived from foreign ports and disembarked in seaports in the Republic of Croatia in 2010, including cruise passengers, the most of them arrived from Italy (83.4%), Greece (7.2%), the United Kingdom (5%), Spain (1.3%) and Slovenia (1.1%).
